

Evaluating the Athletic Potential of the Sport Horse

(Amateur's horse, dressage, jumping, eventing, reining, etc.)

Seminar presented by Dr. Christian Schacht

Veterinarian, Reitlehrer FN, international judge (dressage, jumping, eventing), director of breeding for Oldenburg NA/ISR.

- Easy to use system to identify the strengths and weaknesses of your horse based on its conformation and your equestrian discipline
- Selecting the most appropriate training methods to develop the potential of your horse while maintaining its health and soundness

Amateur riders and professionals (trainers, breeders, etc.) alike will profit from participating in a day of theoretical presentation followed by demonstrations using horses from various disciplines and breeds.

Other days will be used for in-depth, individual practical sessions. Semi-private sessions will be possible for jumping, beginners or adult amateurs. Sessions will be adapted to the level and needs of the rider and horse (beginner rider/newly backed horse to Grand Prix).

If you are thinking about breeding, this is an educational opportunity not to be missed.

October 2012 Seminar locations

Académie équestre du Sablé, Aylmer, Qc.

Seminar : Oct. 26, Practical sessions : Oct. 24.
